Washington, DC 20510

Dear Majority Leader McConnell, Minority Leader Reid, Chairman Thune, and Ranking Member Nelson,

Earlier this year, the U.S. House of Representatives passed legislation I authored – H.R. 5312, the Networking and Information Technology Research and Development (NITRD) Modernization Act of 2016 – with a strong bipartisan vote of 385 - 7.

Originally authorized by the High Performance Computing Act of 1991, the NITRD Program is the primary Federal R&D portfolio in unclassified networking, computing, software, cybersecurity, and related information technologies.

If enacted, my legislation will establish a strategic planning, coordination, and review process for the NITRD investment portfolio with clear metrics and objectives. This will improve the communication between Federal government agencies and laboratories with industry and academia. For example, when more than one Federal agency is working on large-scale R&D, they would be directed to share costs and issue joint solicitations to industry. In addition, the legislation will focus the NITRD portfolio more on large-scale, long-term interdisciplinary research with the potential to make breakthroughs to better society and U.S. competitiveness.

In June, the U.S. Senate Committee on Commerce, Science, and Transportation marked up The American Innovation and Competitiveness Act. Included in this legislation was language on the NITRD program.

As such, I urge the Senate to take up and pass my legislation as a standalone bill, or pass The American Innovation and Competitiveness Act so that the House and Senate can go to Conference and produce a final agreement that includes a modernized NITRD program. Given
